TRUSSMASTER

The Rambor Trussmaster is a free standing complete pneumatic drilling system for the installation of heavy roof cables and bolts. The design incorporates a Drill Guide which acts as a cable pusher, giving a powerful 907 kgf of push on the cable

The Drill Carriage enables the longest drilling stroke possible in the roof height where it is operating and is powered by a double acting pneumatic cylinder that powers up and down.

The Trussmaster has a single Stinger Leg which also powers up and down, so will not get stuck in the roof when trying to move to the next drilling position.

A removable buggy can be fitted to either side of the frame making movement and transportation easier.

The Trussmaster is controlled by a hand-held remote control unit so the Operator can stand safely clear of the machine

- Improved productivity and Operator safety when installing heavy roof cables
- Extendable leg system allows rig to be moved closer to the roof at 200 mm increments
- Low maintenance, stainless steel construction frame
- Available in different configurations to suit seam height up to 3.4m

Specifications

@ 6.9Bar air supply pressure

Stall Torque	251 Nm
Max RPM (no load)	850-900
Max Operating pressure	6.9Bar (100 psi)
Air Consumption	2832 - 3398 l/m
Water flow rate @ 7 bar / 100 psi	12 - 13 l/m
Noise Level	84 - 95 dB(A)
Weight	110-125 kg

	1.3 Stroke	1.6 Stroke
Extended Height	2800 mm	3400 mm
Closed Height	1800.mm	2400 mm
Part Number	0007-1801	0007-2402

Adjustable trolley to match extended legs for safe and reliable tilting into position

- Combination guide and grab arms
- Guides the drill steel when drilling.
- Grabs and feeds the cable/bolt into the hole
